

Local Programs Procedures

LPP 94 -09

State-Local Transportation Partnership Program

Reference: Local Programs Manual, Volume I, Section 3
Revenue and Financing

Effective Date: June 8, 1994

Approved: *Original Signed By*
Chief, Office of Local Programs

A new edition of the Local Programs Manual (LPM) is being prepared, tentatively scheduled for release early next year. The purpose of this LPP is to convey the new LPM section on the State-Local Transportation Partnership Program (SLTPP) in advance of the new LPM release, to help with projects between now and the LPM release. This section replaces the most recent "SLTPP Guidelines."

EXISTING PROCEDURES

Since the "SLTPP Guidelines" were last revised in May 1993, the procedures have been modified by the following major changes:

- The 1993/94 State budget extended the Cycle 3 expenditure deadline by one year to June 30, 1996, allowing a four-year reimbursement period.
- LPP 94-02 modified funding source eligibility to allow developer contributions in SLTPP projects. It also modified project cost reimbursement policies to allow supplemental work as a reimbursable item, effective January 14, 1994.

NEW PROCEDURES

The attached section of the LPM is based on the existing guidelines. There has been some reorganization, clarification, and revision of the material, particularly pertaining to staged projects and determination of eligible reimbursement. But with the exception of the above changes, the procedures remain the same as set forth in the "SLTPP Guidelines." In the future, modifications to the SLTPP section of the Local Programs Manual will be made by LPM updates.
